Totaces Viewers.

Acts of the Gen. Assembly Jan 6, 1639-40 - Whereas the excessive purity of Totaces of late years played in the colony, the evil condition & quality thereof being principally decreased thereby have differed the commensality thereof with others and the entire of some speedy course be established therein; it will be impossible for the planters to receive any relief or subsistence thereby. It is (first) that all Tot. of this years growth should be added to the proportion of fifteen hundred thousand pounds weight. It is thought fit & established that in & for the several limits & precincts mentioned there be yearly chosen & appointed men of experience & integrity for the careful viewing of each man crop. The viewers appointed by the assembly are as follows
